

My Story in Hongkong

Mini-fellowship funded by APPS

Rika Hapsari

Respirology Division

Child Health Department

Airlangga University/Dr. Soetomo Academic General Hospital

SLIT WORKSHOP & PEDIATRIC DERMATOLOGY WORKSHOP

On the first day, I attended the SLIT workshop that was supervised by Prof. Anne Goh and Prof. Ellis Hon. The pediatric dermatology workshop were consist of Eczema scores, Patch test, Skin Prick test, Food challenge test, and Antihistamine.

Free Paper Oral Presentation

Title : Prenatal and post-natal probiotic supplementation as asthma prevention in infants : a systematic review and meta-analysis of randomized controlled trials.

Hospitality at Faculty Dinner

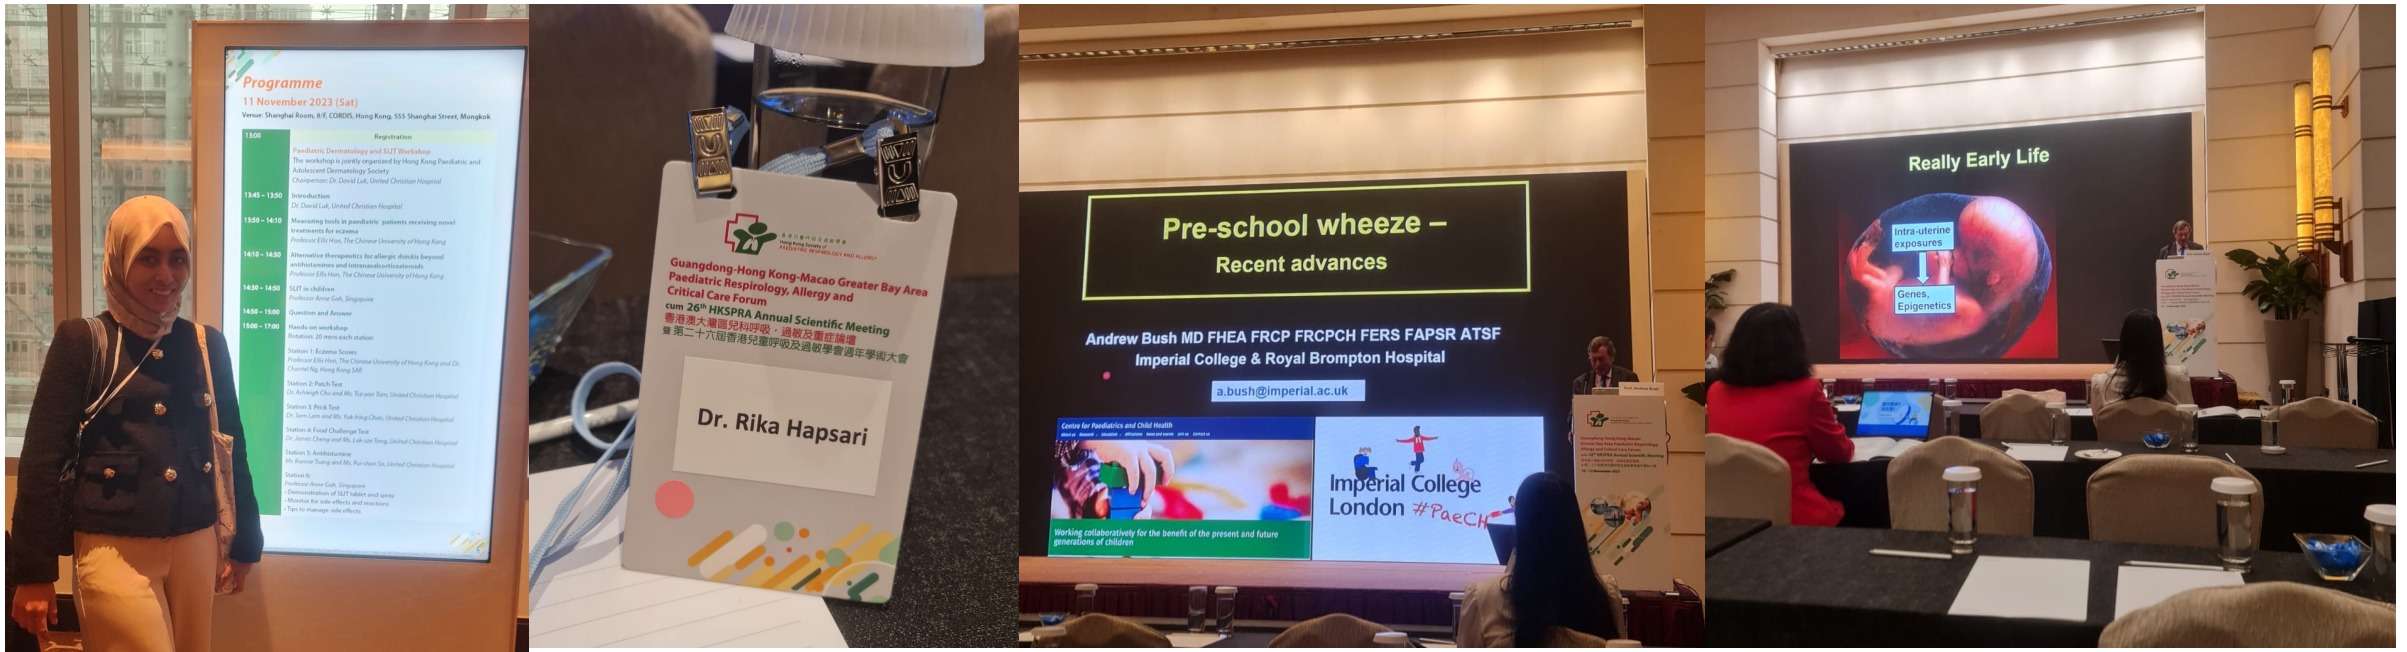

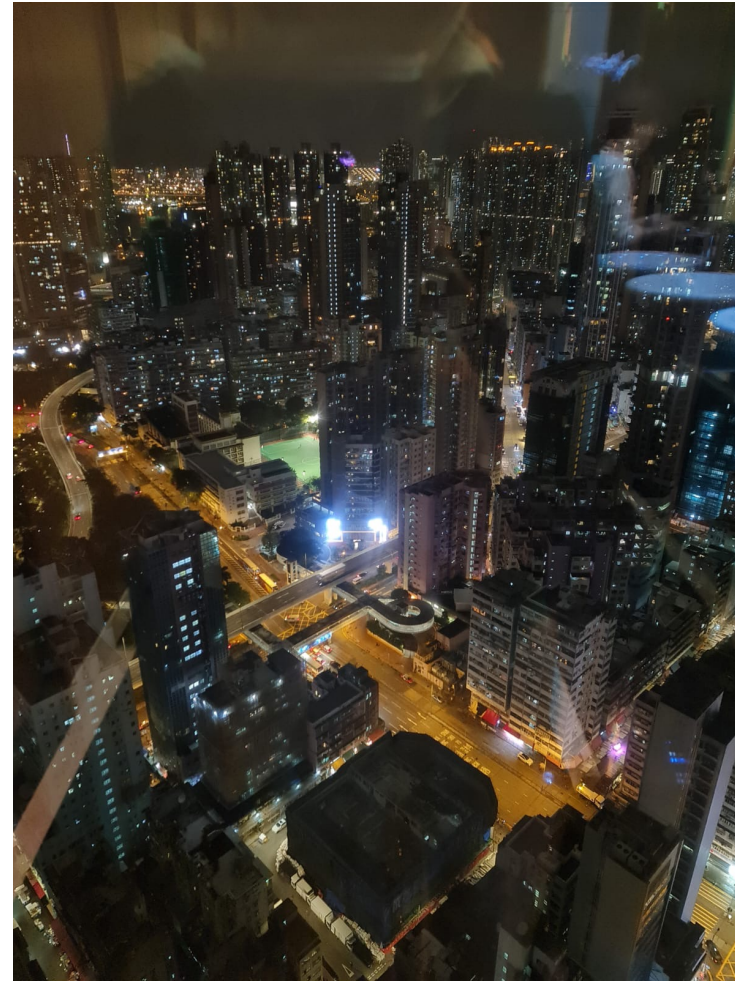

Not only got new lessons and experiences there, but also met new friends from Hongkong, China and Malaysia.

The Scientific Meeting

On the second day, I attended the scientific meeting at Cordis Hotel. So many lessons that I can learnt from the experts from all around the world, especially childhood asthma, allergy prevention, microbiome related with allergy and the immunology after COVID pandemic.

And last but not least, the scenery of Hongkong city was breathtakingly beautiful at day time and even at night time. My deepest gratitude for the APPS committee that gave me this opportunity. I am grateful to be part of young APPS and looking forward to the next collaboration between Indonesia and other Asian country.
